

Declass Review by NGA.

TPDS-33-61
27 November 1961

MEMORANDUM FOR: Executive Director, NPIC

SUBJECT: [] Technical Directive on Technical Intelligence

1. The attached draft Technical Directive, as modified to meet the latest schedule for occupation of [] has been reviewed by the Technical Intelligence Division. The scope of the work as defined in the draft Technical Directive, is sufficient to provide TID with the necessary advice and guidance for the implementation of a technical intelligence system based upon the availability of the [] Univac 490 Computer. Page 4 of the attachment was modified to keep the work schedule compatible with the planned July 1962 moving date and the planned delivery of the Univac 490 for December 1962.

2. I have been assured by [] that the changes in schedule will not significantly affect the estimated cost.

3. This Technical Directive will be Technical Directive No. 2 under Assignment 1 of the [] contract.

4. In order to properly perform the work required under the Technical Directive, it is suggested that [] be provided with Agency TOP SECRET and basic code-word clearances. [] has an Agency SECRET clearance at present and [] has nothing. A request for clearances at the suggested level for these individuals will be forthcoming from TID as soon as the Technical Directive is officially in effect.

5. The scope of the Technical Directive has not been discussed before any Technical Development Committee Meeting since the existing base contract with [] was already in effect.

6. I feel that we should take steps to see that the Technical Directive is issued promptly since [] is now working on an accelerated schedule and will need all the time available to complete the tasks within the assigned times.

[]
Chief, TP & DS

Attachment: 17 October 1961 Draft Technical Directive
